

ABC Abstract:

Aerosol Comparisons between Observations and Models: AeroCom and ABC

Mian Chin, Michael Schulz, and Stefan Kinne

I will represent the AeroCom community to the ABC workshop. I will summarize the activities and results from AeroCom Phase I activities in the past 8 years and introduce the new results and activities in the current AeroCom Phase II. We hope to coordinate some activities with the ABC community to share model output and data access for model evaluations, comparisons, and assessment.
